Work Experience

2023 – Present

Lead Software Engineer
The Knot WorldWide

Lead a team of three developers in the re-platforming of The Bash's and WeddingPro's vendor portals. Collaborating closely with the product manager, the designer, and the engineering manager, we faced the challenge of taking over a project that had been started by an entirely different team that left the company.

2021 – 2023

Back-end Senior Software Engineer
ManoMano

Development of a group of microservices that provide new features that improve the experience of the sellers. In this position, I learned about hexagonal architecture, Apache Kafka and Node.js at the same time I improved my knowledge about Spring Boot.

2020

Back-end Web Developer
IriusRisk

Development of a threat modeling platform using Java, Spring Boot, and Hibernate.

2018 – 2020

Full-stack Web Developer
SIVSA Soluciones Informaticas

Development of Web Applications for Public Entities using Spring, Thymeleaf and Vue.js. At this position I had the opportunity to be the technical leader of a small team of four developers.

2017 – 2018

Full-stack Web Developer
Getronics

Development of Management Web Applications for Inditex using Spring and Backbone.js. I had the opportunity to gain further experience of working with different timezones at the same time, and also working with Databases with large amounts of records.

2015 – 2017

Full-stack Desktop Developer
Imatia Innovation

Development of an ERP in Java SE 8 for textile industry companies. Had the opportunity to liaison and form good business relationships with other medium and small companies.

2013 – 2015

Full-stack Web Developer
InfoJC

Development of Web Java and PHP-based applications. During this opportunity I was part of a small team of four people, which allowed me to build a strong relationship with my workmates.

Academic Background

2009 – 2013

Degree in Computer Engineering
University of Santiago de Compostela (USC)

Completed my final project from 2013 – 2015, based on an *Simultaneous Location And Mapping* algorithm called FrameSLAM.
